VIANU

WHO DECIDES WITH YOU?

OCCUPATIONAL SAFETY

EXPLAINED OPENLY. CLEARLY DELIMITED. DESIGNED FOR DAILY WORK.

VIANU makes custom insoles for employees who stand and walk for many hours. The insole sits in the person's own work shoe. It is a comfort offer and replaces no protective measure and no workplace design. In your on-site safety inspection, you can name the limits clearly.

WHAT YOU NEED FOR YOUR SAFETY INSPECTION

- [ ] SCOPE

  A supplementary comfort offer for work and professional shoes. It replaces no protective measure and no workplace design.

- [ ] WHAT THE INSOLE DOES NOT REPLACE

  An anti-fatigue mat (a mat at a fixed standing spot, for example at the stove) lies in one place. The insole is with you along the whole route of a shift and complements the mat.

- [ ] MATERIAL AND HYGIENE

  OPEN There will be a statement on this once the information is available.

- [ ] EXCLUSION CRITERIA AND DATA PROCESS

  OPEN There will be a statement on this once the information is available.

- [ ] TEST GROUP AND RISK ASSESSMENT

  Check the pilot scope against the risk assessment (your evaluation of the risks at the workplace) and give the test group technical approval. Taking part is voluntary.

Next step: Check the pilot scope against the risk assessment and give the test group technical approval. Contact: Roderich Körner-Rehn. Get in touch on the VIANU B2B page.
